This collection of information is required by 37 CFR 1.133. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.131 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

DABNEY et al.  
Appl. No. 10/659,746  
November 9, 2009

already extended end time upon receiving an additional bid after said end time has been extended; and

allowing sellers to issue direct offers to sell to high bidders before listing expiration, and allowing sellers to issue offers to sell to any bidders after a listing expiration.

21-22. (canceled)

23. (Currently amended) In an online network-connected computer system of the type that receives requests transmitted over a network from users and responds by providing data over said network for display by said requesting users, a method of performing computer based processes to provide data over the network relating to online auction-style listings, the method comprising:

maintaining a database of items available for auction-style listing;

receiving requests allowing sellers to specify whether items are to be listed in said database as conditional or binding transactions;

in response to user requests received over the network, generating and sending data over the network representing displays of (a) the conditional or binding characteristic of an item listing, and (b) at least some other information relating to the item; and

DABNEY et al.  
Appl. No. 10/659,746  
November 9, 2009

receiving further requests representing offers to purchase the item over the network that lead to change in state of the ownership of the item; and

allowing sellers to issue direct offers to sell to high bidders before listing expiration, and allowing sellers to issue offers to sell to any bidders after a listing expiration.

24. (Currently amended) In an online network-connected computer system of the type that receives requests transmitted over a network from users and responds by providing at least data over said network for display by said requesting users, a method of providing online listings comprising:

maintaining at least one database of items listed for sale;

sending, over the network, data representing a user interface display of at least some of said items in a classified advertising listing format;

sending, over the network, data representing a user interface display of at least others of said items in an auction-style listing format; and

allowing sellers, through automatic interaction with the computer system, to select item listings and flexibly change selected item listings between said classified advertising and said auction-style listing formats; and

DABNEY et al.  
Appl. No. 10/659,746  
November 9, 2009

allowing sellers to issue direct offers to sell to high bidders before listing expiration, and allowing sellers to issue offers to sell to any bidders after a listing expiration.

25. (Currently amended) In an online network-connected computer system of the type that receives requests transmitted over a network from users and responds by providing at least data over said network for display by said requesting users, a method of providing online transaction services comprising:

storing auction-style listings in a database;

allowing potential bidders to search through and request selective display of at least some of said database contents via messages exchanged over a network;

accepting bids from users and providing data representing at least some information concerning said bids to corresponding sellers; and

allowing sellers whose items have been bid upon to use the network to issue offers to sell items users have bid on while temporarily suspending auction-style listings for predetermined durations, thereby preventing other users from submitting bids on said suspended auction-style listings when corresponding unaccepted offers to sell from sellers to users for said items are outstanding; and

DABNEY et al.  
Appl. No. 10/659,746  
November 9, 2009

allowing sellers to issue direct offers to sell to high bidders before listing expiration, and allowing sellers to issue offers to sell to any bidders after a listing expiration.

26-37. (canceled)

38. (Currently amended) In an online network-connected computer system of the type that receives requests transmitted over a network from users and responds by providing at least data over said network for display by said requesting users, a method of providing online auction-style listing services comprising:

storing information relating to items for sale auction-style in a computer database;

scheduling auction-style listings and associated end times associated with said listed items;

posting auction style listings on a web page for viewing by users, said auction style listings soliciting competitive bids while concealing predetermined prices the seller will accept to sell items;

receiving, from users over the network, competitive bids with respect to said auction style listings; and

DABNEY et al.  
Appl. No. 10/659,746  
November 9, 2009

in response to a bid received before the end of an auction style listing, allowing authorized sellers to accept bids and unilaterally end auction-style listings before said end times; and

allowing sellers to issue direct offers to sell to high bidders before listing expiration, and allowing sellers to issue offers to sell to any bidders after a listing expiration.
